### Product Description

## Rollator Walker with Seat, Storage Basket and Adjustable Hand Brakes

### **Freedom, mobility and confidence.**

Designed with your freedom in mind, **Hugo Elite Rollator Walker with wheels** is fully equipped with everything you need to stay active and independent. Glide confidently along four large stabilizing wheels and use the built-in seat for a rest stop wherever you need a break. If your balance or stamina is limited because of an injury or condition like severe arthritis, COPD or MS, walking with the Hugo Elite Rolling Walker is a safe and effective way to get the exercise you need.

Our completely revised ergonomic handles are redefining comfort in the rollator market. Their patented design features a unique bump that fits naturally into the palm of your hand. The soft co-molded rubber is not only eye catching, but it helps absorb vibrations. And they are angled for a natural bend in the wrist, leading to better brake access. You'll feel the difference with every step!
